

# PROFIT MANAGER

## Web Site Data Integration

### What data do you want integrated?

You are in control. We can customize each web interface for data you want published, functions you want to permit, with a custom look and feel.

### Helping your customers

- Quotation requests
- Web shopping cart
- Automated email order confirmations
- Automated advance ship notice
- You choose what will help your customers

### Existing web site or no web site

No problem! For existing web sites, we can either work with you to provide publishing functionality to your site or set up a separate site that links to a "login" button on your existing web site. If you do not have a web site, we would be pleased to partner with you to develop a site.

### Helping your remote sales force

- Order status
- Inventory availability
- Sales and pricing history
- Sales history

### Data auto-published from Profit Manager hourly/daily.

The screenshots show the Profit Manager web interface with three main sections: **INVENTORY INQUIRY**, **ORDER DETAIL**, and **ORDER STATUS**. The Inventory Inquiry page features an 'Item Listing' table with columns for Item Number, Description, Price, and Unit of Measure. The Order Detail page includes a 'Checkout' section with shipping and billing information, and a table for items with columns for Item, UOM, Price Per, Quantity, Due Date, and Price. The Order Status page displays a table with columns for Ship Date, Value of Line Items, and Freight & Ship Chg.

The Shopping Cart page displays a table with columns for Item, Quantity, Due Date, and Price. It includes 'update' and 'delete' buttons for each item. The cart contains items like '5 H.P. ENGINE', '100 H.P. GO CART', and 'BRAKE CABLE COUPLINGS'. The 'Order Total' is \$551.62.

### Order acknowledgment to customer.

### Auto-import into Profit Manager as sales order.
